

The savings listed here are based on minimum results expected, and do not include savings provided by octane boost, nor any monetary representation of extension of engine life. Large motors are often higher. Your results may vary.

Savings Chart

Average MPG	Gal. Req. 30,000mi.	Gal. Saved with Gasaver	Average Savings - in \$ price per gallon

*Vehicles getting less than 9 miles per gallon require 2 vials of platinum formula every 6,000 miles.

PLATINUM Gasaver

Providing Peace of Mind

Since the GASAVER cleans engines of harmful abrasive carbon deposits it is an inexpensive, long-term preventive maintenance plan for the automobile that provides peace of mind with no additional effort. For many others, knowing that they are getting the best gas mileage while maintaining the quality of their vehicle is a matter of principle. With the 101 demands on our time it is easy to see why the majority of us neglect car maintenance. On top of the 22-28% fuel savings, customers can receive additional savings by protecting their vehicles from premature engine problems that lead to expensive car repairs. Beyond the purchase of a home, the vehicle is the second largest investment most people make.

A 22-28% savings helps many families smooth the rough edges of their family budget. It could mean a mortgage/car payment, school clothes for the kids, or a family vacation.

PLATINUM Gasaver

Save Gasoline
Preserve Engine Life
Reduce Emmissions

Platinum is the best known material for making unburnt fuel burn.

PLATINUM Gasaver

The Gasaver works on all fuel injected and carbureted gasoline burning engines

The Vehicle For Success

86% of all households own at least one vehicle, many of them own two or more, and the number of first time car buyers increases on an average of 10% per year. Over 2 million vehicles were registered with Motor Vehicles Department in July, 1998 alone. Our ongoing love affair with the automobile means unlimited sales potential of the GASAVER for you.

The average consumer puts 15,000 miles per year on their vehicle, with an average of 60 billion gallons of fuel consumed each year. The current vehicles of choice are Sports Utility Vehicles and Minivans. Last year 1,880,000 Sports Utility Vehicles were purchased, but as gas prices increase heavier vehicles become less practical to drive. Once our consumers discover for themselves how much money they can save with the GASAVER they make multiple purchases, a GASAVER for each of their vehicles. The GASAVER was developed in 1977 and has been successfully marketed since 1979.

How does the system work?

The GASAVER is an EPA registered, automotive fuel-saving system which increases the fuel mileage of gasoline-powered engines by an average of 22-28% while meeting all federal and state emission standards. With a simple connection to a vacuum line, the GASAVER injects microscopic quantities of a vapor form of Platinum into the gas-air mixture causing the fuel to burn more completely inside the engine. With Platinum in the flame zone, you significantly increase the percentage of fuel burning in the engine from 68% to 90%. Platinum has the unique ability to make non-burning fuel burn.

How does the GASAVER Catalyst Delivery System work?

Our system consists of a molded plastic container (about the size of a video tape at 7" high x 4" wide x 1" thick), which holds the pre-measured Platinum formula. The engine vacuum draws Platinum in the form of a vapor from the Platinum solution into the intake manifold where it joins the fuel-air mixture entering the engine.

The standard catalytic converter process takes place outside of the engine where, unfortunately, the energy produced cannot be harnessed to power the vehicle. The Platinum in the GASAVER system works the same way that Platinum in your catalytic converter works to cause the unburned fuel that has left the engine to burn. With Platinum in the combustion chambers, 22% more of each gallon burns inside the engine so that 22% fewer gallons are required to drive the same distance.

Benefits of the GASAVER Catalyst Delivery System:

- Increases gas mileage (gasoline savings average more than 22%)
- Cleans engines, throughout of harmful abrasive carbon deposits
- Works in conjunction with and extends the life of catalytic converters
- Engines burn more completely capturing 22% of all fuel that is normally wasted without the GASAVER system
- 3-5 point octane boost
- Significantly reduces pollution
- Gives vehicles more power and acceleration
- Easy to use, pre-measured bottles of platinum formula
- Installs in 10-15 minutes with easy to follow instructions. No special tools needed
- GASAVER Catalyst system is small
- Fits conveniently in engine area
- GASAVER is safe and compatible with all gasoline burning engines

What Did the U.S. Government Study Prove?

On February 28, 1984, four years of administrative procedures were completed by the Consumer Protection Department of the United States Government reviewing the GASAVER Catalyst Delivery System. The Government's conclusions were as follows:

1. National FuelSaver Corporation invented and markets a product called (Platinum) GASAVER which brings about more complete combustion and better gas mileage in automobile engines by means of a Platinum catalysis.
2. The (Platinum) GASAVER offers 15% to 30% fuel savings when applied properly to a gasoline engine.
3. Independent testing parties make stronger claims for (Platinum) GASAVER than does National FuelSaver Corporation.

Decarbonize Your Engine with the Gasaver

Does the GASAVER Harm the Vehicle or the Environment?

The GASAVER is completely safe for all gasoline engines. It improves emissions and works in conjunction with existing pollution control devices. The GASAVER system does not put out any new or additional gases or pollutants into the environment and it is EPA registered. If the next generations are to have a safe environment to live, we must all do our part to save the environment. The GASAVER allows each of us to do our part with minimal effort. The GASAVER drastically reduces pollution by completely capturing and using 22% of all normally wasted fuel.

What does the Gasaver kit include?

- 5 vials of platinum formula. Each vial is good for 6,000 miles with a total of 30,000 miles per standard kit.

THE FOLLOWING ITEMS ARE INCLUDED AT NO ADDITIONAL CHARGE

- 1 patented dispensing unit
- 1 T connector
- 1 Three foot hose
- 1 Bottle of proprietary Blue Solution
- 1 Self-locking release strap
- 4 month unconditional guarantee
